**BIG** IN  
YOUNG EXPERIENCE  
IN IDEAS

Over the past few years, we at OLI, have strived to offer you sustainable products that not only have a strong functional component, but allow you to create your dream bathroom. We want to help you design a truly unique place that you can be proud of. Therefore, it is with great pleasure that we present the products within this catalog.

For over 60 years we have been committed to growing our business sustainably, by investing in new products and markets. Our global success can be attributed in large part to our continuous effort to better our products and anticipate market needs. We strive to continue to grow and expand our business. At the same time, we want to achieve this without forgetting our roots, the fact that we are a business founded on traditional and family values.

Our business is helping you design the perfect bathroom.

We'll provide you with the tools and resources you need to create your masterpiece. Afterall, our clients are part of the OLI family and as such we treat them like family! Being part of our family means that not only will you have the product you need, we are behind you every step of the way. Learn more about OLI design support on page 16-17.

Our products are designed with you in mind and we welcome your feedback!

# COMPANY HISTORY

1

2

**BIG** IN  
YOUNG EXPERIENCE  
IN IDEAS

On March 1st of 1954, Oliveira & Irmão SA was founded in Aveiro (page 5) as a small family business that along its path went through different areas of business. In the 1980s OLI set up its first cistern production unit. During the following ten years, OLI grew exponentially, which led to the integration with the Italian (1-2) Fondital Group in 1993. The group has about 2,600 employees and is present in four sectors of activity: heating; aluminum; hydraulic and chrome plating; and fire protection. OLI Italy was established in order to increase our presence in Italy and Europe.

Throughout its history of 60 plus years, OLI has received many distinctions and awards. This demonstrates our commitment to excellence and our respect for the user of our products. We are the Portuguese company with the most patents and are at the forefront of investment in Research, Development and Innovation.

We strive to build a strong bond with you based on mutual trust and to become your sanitary systems supplier of choice. We will do this through continuous improvement; through the development of innovative, sustainable and market ready products; and; finally; by relying on your feedback and market insights.

# GLOBAL COVERAGE

Built to surpass global standards.

Tailored to your market

We are present in over 70 countries worldwide and are proud that we are able to adapt our wide range of products to the unique characteristics of each country.

We are also proud of the quality of our products. Our products are designed based on a well-structured research, development and innovation policy, and are recognized and certified by the highest world standards. This motivates us to continue to invest in a personalized differentiation strategy.

Regardless of where you are, OLI wants to be your partner in design solutions.

# SUPPORT

OLI is behind you every step of the way

We are committed to offering you the best products available. **Quality comes first.** Rest assured that when you select a product from OLI you will receive the very best we have to offer.

To ensure you are completely satisfied, we are committed to offering you the following services:

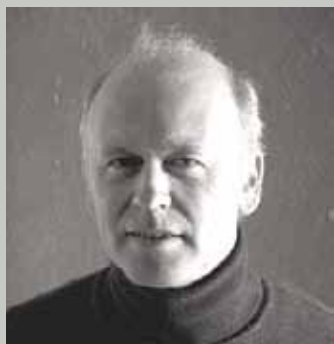

- Guidance in choosing the most adequate high-quality design solution for your project: for assistance selecting the appropriate product based on your design needs, see pages 108 to 123.
- Providing effective and intuitive BIM objects of our products in order to facilitate the design of your perfect bathroom. We are proud to launch our products as BIM objects.
- Installation advice and training\*;
- Maintenance advice and training\*;
- Technical assistance;
- Warranty assistance.

\* Our website, [www.oli-world.com](http://www.oli-world.com) contains installation and maintenance videos and instructions. Our videos are easy to understand and a quick way to learn about our products. However, if you require further information, an OLI representative is always available and willing to help you with any questions you may have. Please see our website for more information and how to contact us.

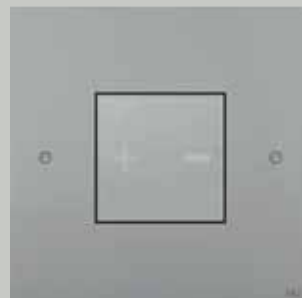

# DESIGN PARTNERSHIPS

## ROMANO ADOLINI

The Ino-x control plate collection was designed by Romano Adolini, an Italian architect and designer who is an influential figure in bathroom design.

The Ino-x collection is simple, elegant and with a strong visual impact: "A simple sheet of steel that is only 2mm thick cut with a precise laser".

---

## EDUARDO SOUTO DE MOURA

Souto de Moura is a renowned Portuguese architect who has been presented with various international awards, such as, the Gold Medal of Heinrich Tessenow Foundation in 2001; the Pritzker Award in 2011; the Wolf Prize of Arts in 2013; just to name a few.

In 2001, in collaboration with OLI, Souto de Moura developed the SM15 for the new Pousada of Portugal in Covilhã.

---

## ÁLVARO SIZA VIEIRA

Álvaro Siza Vieira is a world-renowned architect who has collected several international awards, Pritzker Prize in 1992; The Wolf Prize of Arts in 2001; the Golden Lion for Lifetime Achievement in 2012; the Fritz Hoyer award in 2014, just to name a few.

The Trumpet control plate was designed by Álvaro Siza Vieira and is the perfect combination of elegance and harmony, both characteristics of a trumpet.

In 2016, the "Trumpet" was selected "Best of Category" for the "Archiproducts Design Awards" one of the most prestigious awards of Architecture and Design worldwide.

# SUSTAINABLE SOLUTIONS

We are committed to the efficient use of water

SAVES UP TO **9L** OF WATER PER DAY

Water is a scarce resource which has, in recent decades, become a resource of extreme importance. Climate change has accentuated this phenomenon and its rational use has become a priority.

In an average home, the bathroom represents about 32% of water consumption, thus making the bathroom the ideal place to reduce water waste.

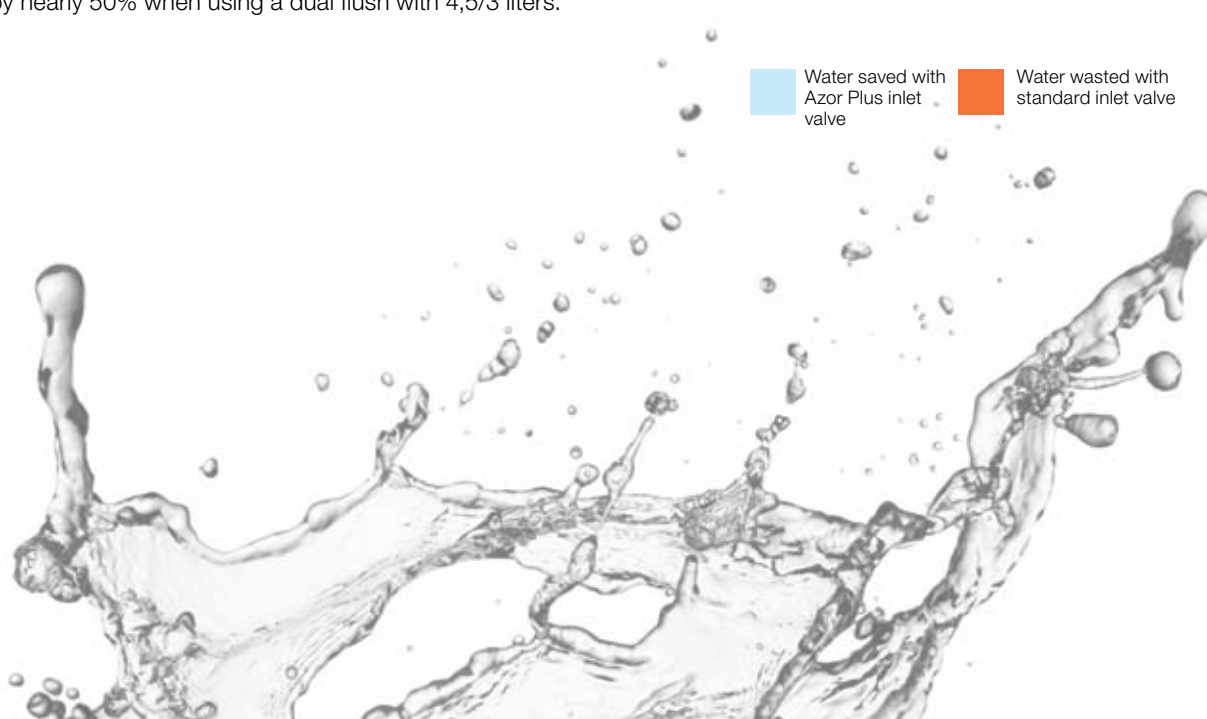

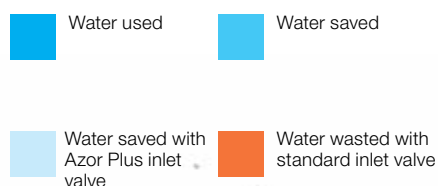

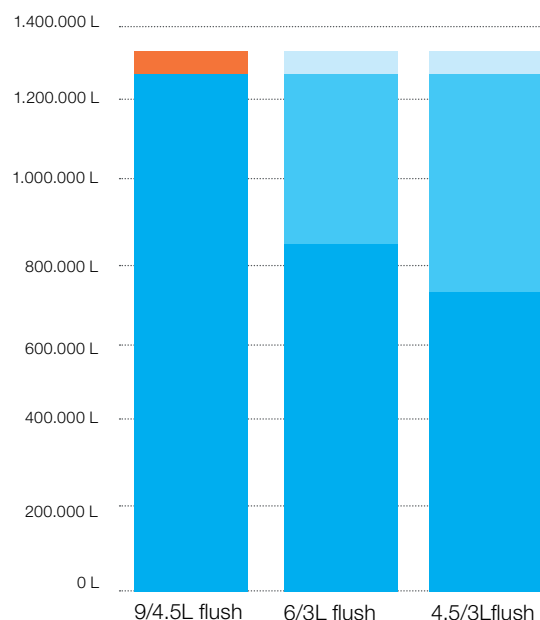

Our products are designed and produced using the latest technology and always respecting environmental concerns. This means that you don't have to sacrifice your dream bathroom for water efficiency. Design and sustainability go hand in hand at OLI.

We have estimated that the use of the Azor Plus inlet valve saves up to 9 liters of water per day, in a family of four. This is even more significant in public places, such as a hotel with 100 rooms.

The annual consumption of water can be further reduced by more than 30% when using a dual flush system (6/3 liters) and by nearly 50% when using a dual flush with 4,5/3 liters.

## HOTEL 100 ROOMS

Annual water consumption in a hotel with 100 rooms with an average of 4 flushes per day.

# HYDROBOOST SYSTEM

The new environmentally  
friendly technology.

One-and-only with no connection to the  
electrical system.

## HOW IT WORKS:

1. Water enters the cistern to fill it;
2. As the water fills the cistern, it passes through the hydro generator that harnesses this movement to generate and accumulate the energy until the inlet valves closes;
3. This energy supplies a capacitive sensor which, in addition to detecting the proximity of the human body (up to 20mm), also monitors the accumulated energy levels in the hydro generator. This monitoring ensures that even without continuous use, the system works properly. To this end, when necessary, automatic flushes are made in order to maintain the hydro generator loaded.
4. The servomotor is controlled and supplied via the capacitive sensor, it activates the flush valve by rotating in one direction for the complete flush, and the other direction for the half flush.

Hydroboost is a technology developed by OLI that harnesses the power of water in motion to generate enough energy to power a capacitive control plate.

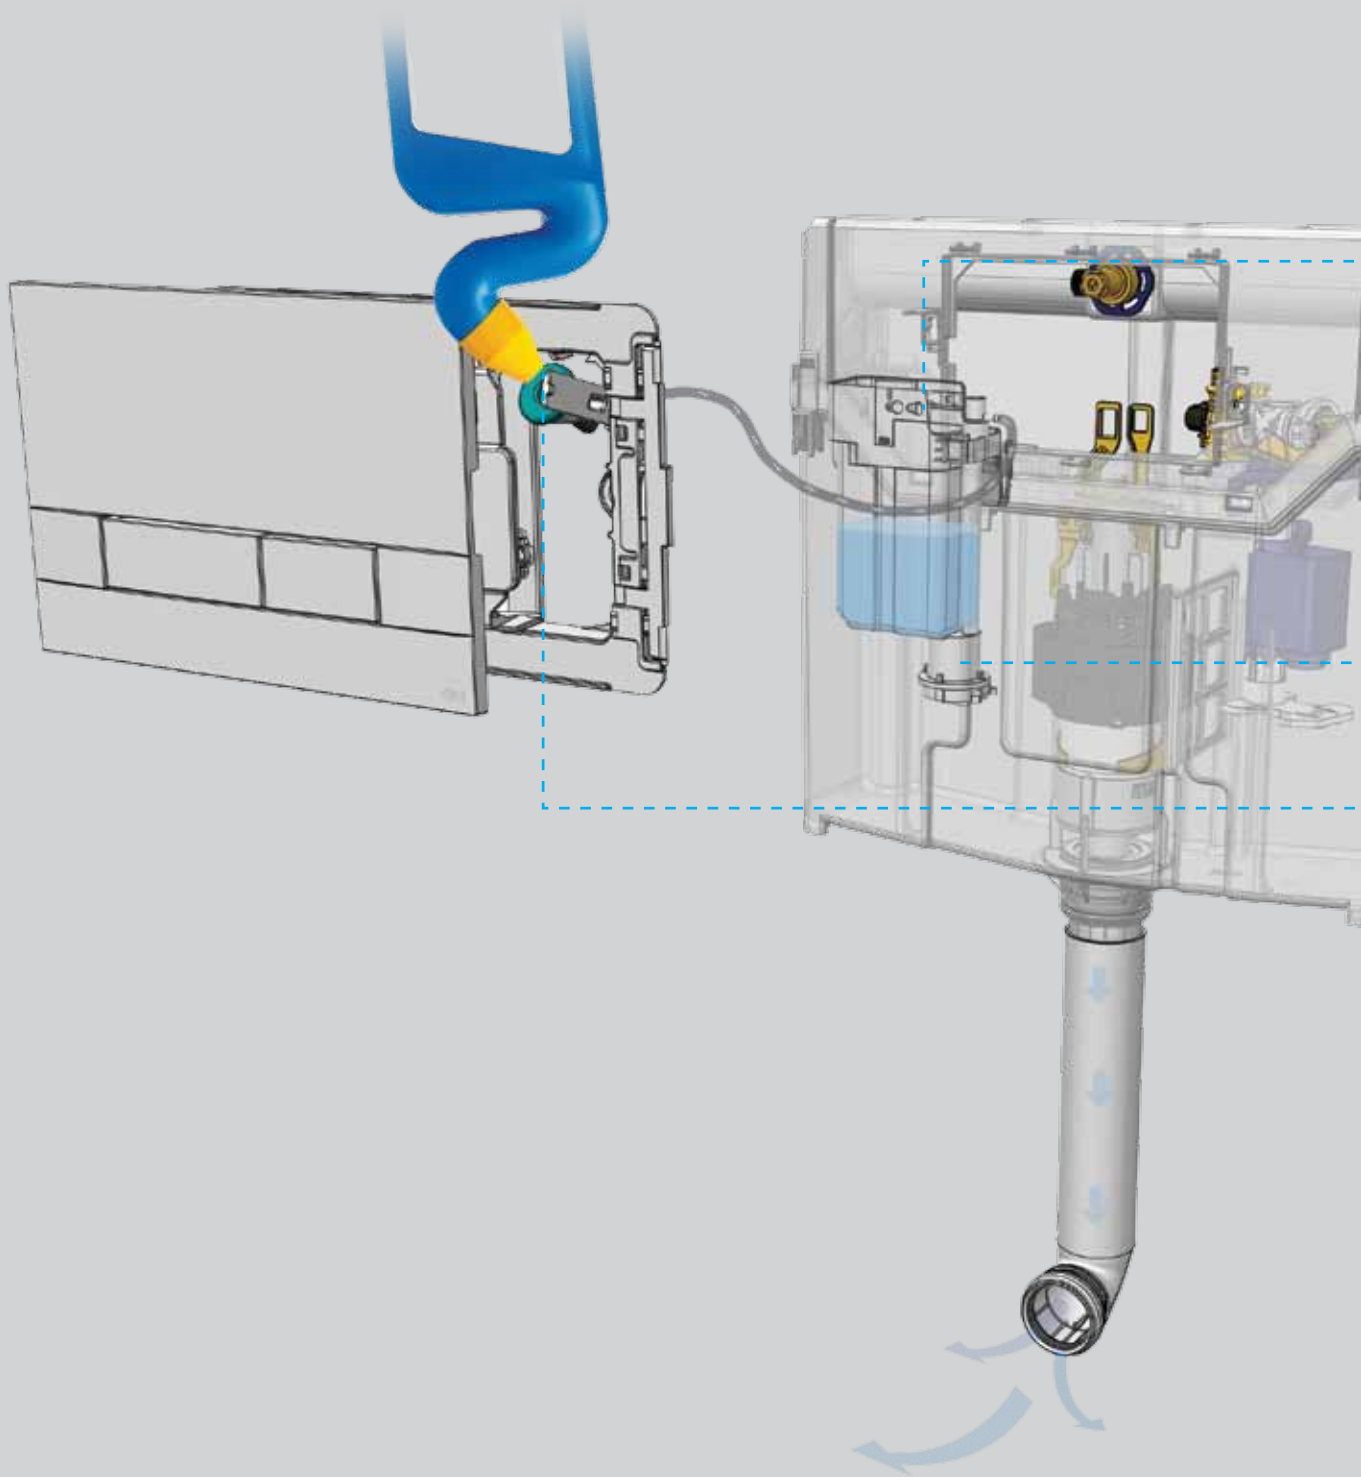

The system is available with our no-touch dual flush control plates. All it takes is the approach of a hand for the flush to be activated.

The use of this technology requires no connection to the electrical grid or the replacement of batteries, since it harnesses the energy of water in motion and uses that energy to activate the control plate.

# OLLipure®

The best solution for the  
perfect bathroom hygiene

OLI Pure creates a fresh atmosphere and provides an immediate feeling of comfort and cleanliness, without any effort.

OLI Pure is a closed storage system with a cleaner that is placed inside the cistern and with each flush releases the disinfectant into the toilet.

It is compatible with all WC cleaners and has a storage capacity of 450ml.

#### HOW IT WORKS:

- **Universal:**  
Compatible with existing WC detergents on the market.
- **Long lasting:**  
Storage capacity of 450ml.

- **Controlled Dosage:**  
2ml per flush

- **Fast and easy to refill**  
1 bottle of WC detergent is offered when purchasing a OLIpure control plate

# HAPPY AIR

A fresh solution for air renewal

The high power and low noise extractor eliminates odours directly from the toilet (70% of odours) and steam (30% of condensation) via an elegant and discreet plate, installed in the wall or on the ceiling.

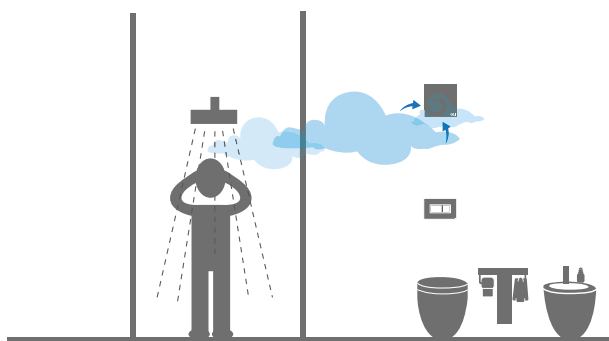

Happy Air is easy to install: it is directly connected to the OLI74 Plus concealed cistern and can be installed in the wall or on the ceiling.

The extractor has a switch that is installed in parallel with the lighting, and can be activated with a dedicated button or with a presence detector.

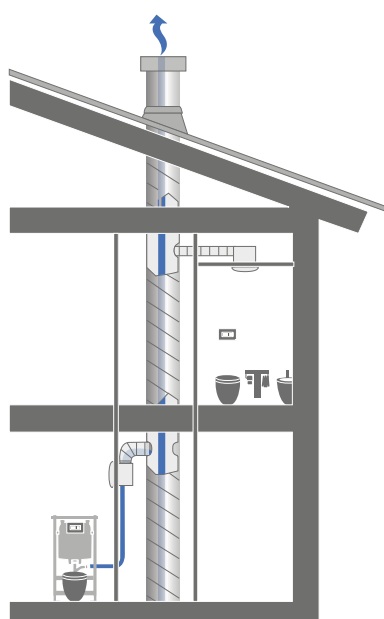

The Happy Air system is extremely quiet; designed so as not to exceed a noise threshold of 35 dB (A); this ranks Happy Air as industry-leading in terms of performance.

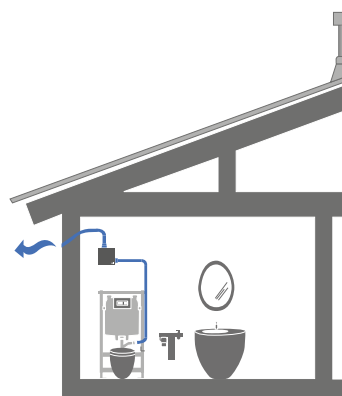

EXTRACTION OF ODOUR  
FROM THE BATHROOM

EXTRACTION OF STEAM  
FROM THE BATHROOM

Connected to the ventilation stack

Connected directly to the wall

THE VENTILATION PIPE IS CONNECTED  
DIRECTLY WITH THE VENTILLATION STACK,  
OR THE WALL WHEN REQUIRED BY LAW.

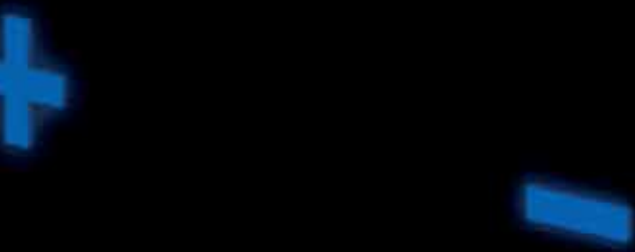

# QR-INOX

The future of bathroom renovations

QR-INOX is the perfect combination of elegance, functionality and beauty. Installation is simple and fast because the walls do not need to be opened and the existing water connections can be used. The sanitary module is available with a no touch option that comes equipped with the Hydroboost technology.

OLI

A universal and versatile solution for a quick and easy remodelling of your bathroom.

Quick Refit (QR) is a sanitary module that adapts to many locations, designed for greater space saving in any bathroom. With reduced dimensions and incorporated high technology, the QR sanitary module is the best option for a quick renovation of your bathroom or for a new sanitary installation. You don't have to break the wall to achieve the concealed cistern look and when remodelling, you can use the existing inlet and outlet water connections.

QR-Inox is designed to redefine the concept of concealed cisterns. With its small size, the advanced technology employed and the sophistication of its design, it is the ideal solution for both new and renovated bathroom.

# QR-INOX

Give your bathroom a touch of luxury

SAVES UP TO **9L** OF WATER PER DAY

## NO TOUCH

With the QR-INOX NO TOUCH, there is no need to touch the module to activate the flush. The tempered glass is equipped with capacitive sensors and hydroboost technology, and detects the approach of the human body at approximately 20 mm. You can choose between the half flush and the complete flush by simply approaching your hand to the corresponding light symbol. With the QR-INOX NO TOUCH, hygiene and convenience are taken to a new level, by adopting to a clean and sustainable technology.

## BUTTON

The QR-INOX BUTTON comes with a stainless steel tilt selector button with a matt finish for activating the flush.

The button's rounded shape provides the QR-INOX BUTTON with nobility and distinctiveness.

# EASY MOVE

Elegant movement redefined

Easy Move is the complete package. It offers a solution that is both aesthetically pleasing and highly functional that allows the user to vary the height of a toilet using a remote control. When simple movements, such as getting up from sitting on the toilet, become a problem, Easy Move intervenes by simplifying the lives of children, the elderly and people with reduced mobility.

Easy Move is extremely versatile: it is compatible with all wall hung toilets. The powerful engine exerts a lifting force of 600 kg. The structure moves the toilet up to 150mm with the user seated.

Silence is guaranteed: during operation the engine noise is almost imperceptible. The Easy Move structure comes with a flexible flush pipe and has a movement speed of 12 mm per second, thus allowing the toilet to move quickly along the frame.

Easy Move is available in both black or white tempered glass.

Compatible with all mechanical control plates

## AVAILABLE FINISHES:

BLACK

WHITE

# CONTROL PLATES

# MOON

The perfect balance between beauty,  
harmony and elegance

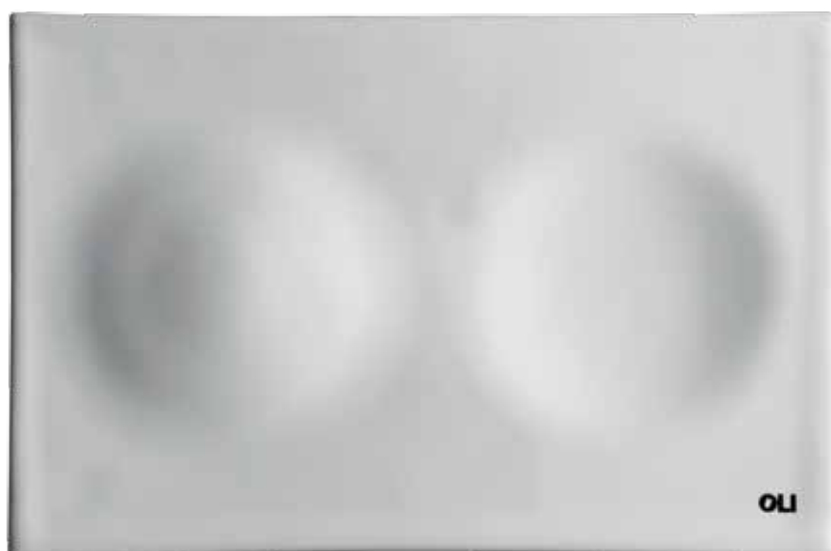

One-and-only ceramic control plate that has a one piece ceramic body with innovative shapes.

Simple and elegant in design, Moon combines high technology while continuing to offer a simple and intuitive solution for the user.

It is a capacitive control plate that is activated as the hand approaches, thus eliminating contact with the device and ensuring maximum hygienic conditions.

Moon is equipped with the Hydroboost system, that makes it independent from traditional sources of energy (i.e. the electrical system).

AVAILABLE FINISH:

White Ceramic

NOTE: See compatible concealed cisterns on Pg. 113.

# TRUMPET

*Designed by Álvaro Siza Vieira*

Inspired by an instrument  
played by great maestros,  
the trumpet, it is the perfect  
balance between a truly unique  
design and exceptional music.

The Trumpet control plate was designed by Álvaro Siza Vieira, world-renowned architect and winner of the Pritzker Prize.

Elegant design with two buttons for the dual flush system that perfectly characterize the pistons of the trumpet.

*"I am very pleased with the prestigious "Best of Category 2016" award for the Trumpet control plate. The quality achieved is due to the competent and committed contribution of the technicians at OLI. It was a pleasure to evolve the design of the control plate with them."*

GRATES AREN'T NECESSARY WITH THIS SYSTEM

# SELECTING THE IDEAL CISTERN

With a wide array of models and different application systems, selecting the correct concealed cistern can be difficult. To facilitate your search we have devised a three step selection map. By following the steps in the next few pages, you will have the perfect control plate and the ideal concealed cistern. With our vast range of control plates, your hardest decision will be choosing the perfect one.

Pages 110-119 are divided by control plate actuation type and in order to match your control plate to the ideal cistern you need to know some details regarding installation. The wall type and the minimal wall thickness are crucial to choosing the correct cistern. To learn more about installation systems see page 113.

OLI is committed to guiding you in selecting the most adequate high-quality design solution for your washroom, therefore, if you require further assistance or have any doubts please visit our website, [www.oli-world.com](http://www.oli-world.com), for helpful videos or for more information on how to contact us.

Matching the perfect control plate with the ideal concealed cistern:

**1**

Choose control plate

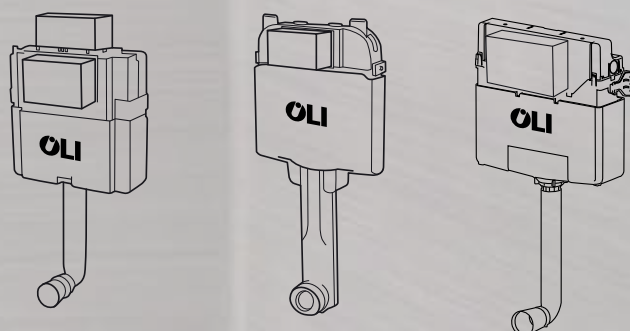

**2**

Select wall type and installation system

**3**

Select minimal wall thickness

# MAIN CHARACTERISTICS

## - Silent Efficiency

All OLI in-wall cisterns are equipped with silent NF class 1 certified inlet valves. Providing fast filling with minimal noise.

## - Versatility

OLI offers a wide range of in-wall cisterns, with mechanical, pneumatic, electronic, or **Hydroboost**  technology actuation.

## - Space reduction and greater hygiene

The use of in-wall cisterns for wall-hung toilets (tested for a 400kg load) contribute to a faster and more effective cleaning of the bathroom and remove architectural barriers caused by traditional floor standing toilets.

## - Easy water grid connection

Connecting to the water grid is simple and fast, without the need for tools or connection accessories. The shut off valve is located inside the cistern and opening and closing the valve can be easily done without any tools.

## - Guaranteed Access

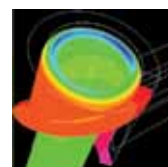

Via the control plate the interior of the in-wall cisterns, can be rapidly accessed and all components can be easily removed for maintenance.

## Solid Wall - brick lined

### Direct

This wall installation system should be selected when installing the cistern in a solid wall that will be brick-lined with a floor-standing toilet.

For further information about installation and maintenance of OLI sanitary systems, please check the videos at [www.oli-world.com](http://www.oli-world.com)

## Solid Wall - brick lined

### Simflex System

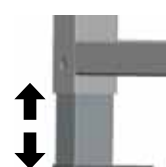

This wall installation system should be selected when installing the cistern in a solid wall that will be brick lined with a wall-hung toilet.

## Drywall

### Sanitarblock System

The Sanitarblock installation system can be used in drywall applications as well as solid wall applications. The main advantage of the system is the ease and speed of safely installing a cistern with a wall-hung toilet. The Sanitarblock system is equipped with a Fast Fit system for fixing the frame to the load bearing walls. In compliance with French Standard NF XP-D12 208 (400 kg).

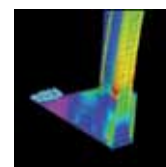

## Drywall

### Sanitarblock Free-Standing

The Sanitarblock free-standing installation system is used in drywall applications with a wall-hung toilet. The main advantage of the system is the ease and speed of safely installing a concealed cistern with a wall-hung toilet without the need of any type of wall.

The feet of the Sanitarblock Free-standing system are designed so that the structure offers good resistance when only secured to the floor; load resistance is guaranteed in compliance with the French Standard NF XPD12 208 (400 kg).

061563	● QR-INOX FLOOR BUTTON BLACK

- Supplied with OLI74 Plus cistern; (see page 134)
- 6mm tempered glass front panel with a brushed stainless steel lateral frame;
- 108mm thick;
- QR-INOX Button - Pneumatic actuation;
- QR-INOX No Touch – Capacitive sensor with hydroboost.

## EASY MOVE

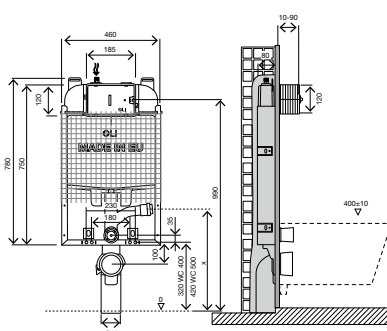

Code	Description
005308	EASY MOVE MECHANICAL
601833	● BLACK EASY MOVE BLACK
601831	○ PAINEL FRONTAL EASY MOVE WHITE

- Supplied with OLI74 Plus cistern; (see page 134)
- Ergonomic system that is adjustable in height by 150mm;
- Compatible with all wall-hung toilets;
- Silent electric engine;
- Power supply: 220V (50/60Hz);
- Power source: 350 Watt;
- Insulation: IP66;
- Movement velocity of 28mm/s;
- Tempered glass 6mm thick;
- Push power: 6000N (ca 600kgf);
- Traction power 3000N (ca 400kgf);
- Frame tested for 400kg;
- Easy and quick installation with fast fit system.

## OLI74 PLUS HAPPY AIR

Simflex

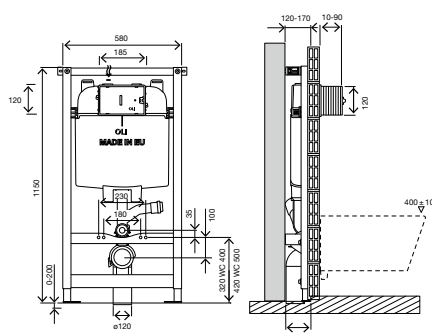

Code	Description
048591	OLI74 PLUS MECHANIC HAPPY AIR SIMFLEX

- OLI74 Plus cistern; (see page 134)
- Supplied with "Y" flush pipe for Happy Air fan connection;
- Compatible with all wall-hung toilets;
- Installation in solid wall-brick lined;

## OLI74 PLUS HAPPY AIR

Sanitarblock

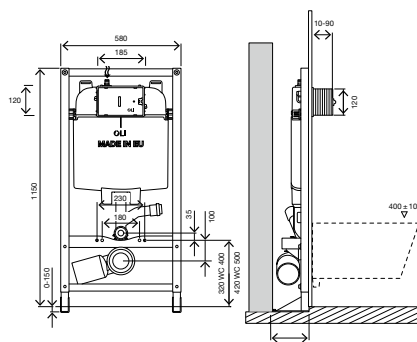

Code	Description
048590	OLI74 PLUS MECHANIC HAPPY AIR SANITARBLOCK

- OLI74 Plus cistern (see page 134)
- Supplied with "Y" flush pipe for Happy Air fan connection;
- Compatible with all wall-hung toilets;
- Drywall installation;
- Frame tested for 400kg;
- Depth adjustable outlet bend;
- Easy and quick installation with fast fit system;
- Height adjustable up to 200mm.

## OLI74 PLUS HAPPY AIR

Free-Standing

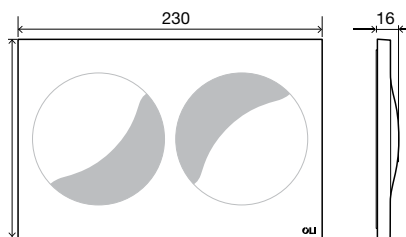

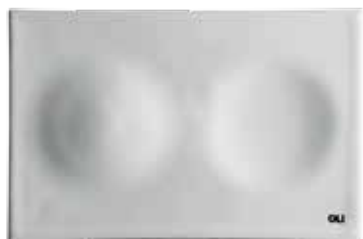

Code	Description
101774	OLI74 PLUS MECHANIC HAPPY AIR FREE STANDING

- OLI74 Plus cistern; (see page 134)
- Supplied with "Y" flush pipe for Happy Air fan connection;
- Compatible with all wall-hung toilets;
- Drywall installation;
- Depth adjustable outlet bend;
- Frame tested for 400kg;
- Height adjustable up to 150mm.

## MOON

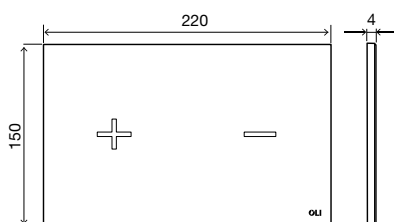

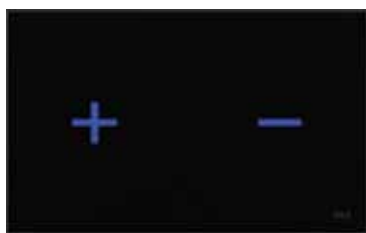

Code	Description
059887	MOON

- One-piece, white ceramic control plate;
- Dual flush;
- No-touch activation;
- Detection capacity - up to 20mm;
- Compatible with Hydroboost system;
- Hygienic and easy to clean;
- Gull-Wing opening system, acts as an anti-fall system during maintenance;
- Anti-error electronic connections;
- Waterproof connectors;

Minimum front wall thickness:  
OLI 120 PLUS: 10mm

## GLASSY

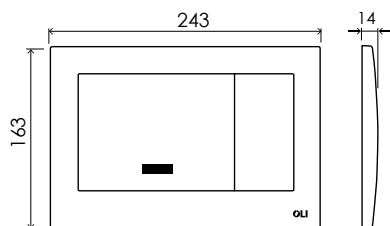

Code	Description
069857	GLASSY BLACK
069130	GLASSY WHITE

- One-piece, 4mm thick tempered glass;
- Dual flush;
- No-touch activation with LED signs;
- Detection capacity - up to 20mm;
- Compatible with Hydroboost system;
- Hygienic and easy to clean;
- Gull-Wing opening system, acts as an anti-fall system during maintenance;
- Anti-error electronic connections;
- Waterproof connectors.

Minimum front wall thickness:  
OLI 120 PLUS: 10mm

## ELECTRA III

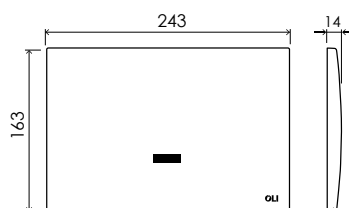

Code	Description
079206	ELECTRA III POLISHED CHROME

- Infrared sensor;
- Dual flush (<60s half flush; >60s full flush);
- The full flush can be activated manually;
- Actuation force < 20 N;
- Automatic pre-cleaning of the toilet;
- Electric power connection with pre-installation needed (adapter 230v/120v not included);
- Vandal resistant;
- Polished chrome Zamac.

## ELECTRA II

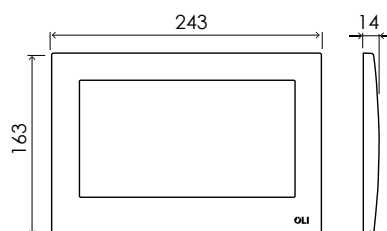

Code	Description
079205	ELECTRA II POLISHED CHROME

- Infrared sensor actuation;
- Dual flush (<60s half flush; >60s full flush);
- Automatic pre-cleaning of the toilet;
- Electric power connection with pre-installation needed (adapter 230v/120v not included);
- Vandal resistant;
- Polished chrome Zamac.

## ELECTRA I

## NOTES

[illegible]

## This image shows a full page of white paper with horizontal dotted lines. The lines are evenly spaced and run across the width of the page, providing a guide for handwriting practice. There are no margins, text, or other markings on the page.

## Inspired by water...

For decades, OLI has been developing and producing sanitary installation systems aimed at innovation.

The dual flush cistern and the inlet valve were two major inventions. Currently, OLI is a worldwide reference. It has over 40 active patents in Europe resulting from a continuous investment in Research and Development, guided by the constant challenge of water sustainability.

Its know-how is acknowledged by its means and technologically advanced resources and the partnerships established with universities and research centres. In its factory in Aveiro, OLI controls the value chain: there, the idea emerges, the mould is produced, production takes place and the product is marketed in over 70 markets throughout the five continents.

The rising importance of contemporary design and of the incorporation of new technologies and materials, clearly shown in the solutions presented in this catalogue, reaffirm OLI as a brand of excellence.

Inspired by water...
